

# Introducing Level Lock Plus™

Where Fast Installation Meets Innovative Adjustment

# LEVEL LOCK™

## Advanced Design for a Simple Installation

Our innovative glass railing system gives you the sightlines you desire, with the fast installation you require.

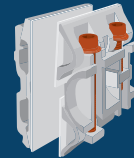

Mechanism allows the glass to tilt up to 2° in either direction

Mechanism can be installed from either side of the shoe

Grooves\* in the inner channel prevent shifting during glass installation

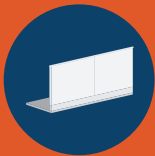

Easy access to tighten fasteners\* from the top of the shoe

\* shown in orange

   @wagnercompanies

## Safety is Our #1 Priority

A symmetrical channel allows for installation on either side of shoe for added safety on elevated surfaces

Thicker material at the bottom of the shoe for added durability to prevent splaying

Advanced tilting technology allows for precise alignment of consecutive glass panels
