

# PANELGRIP® GLASS SHOE SYSTEM

The Clear Choice.

## Dry Glaze Glass Shoe System

Postless design offers sleek sight lines for maximized light flow

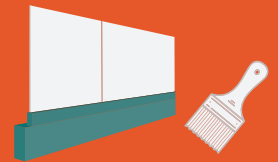

Ideal for guard, stair, ramp, and balcony applications

Unique, durable infill locking mechanisms

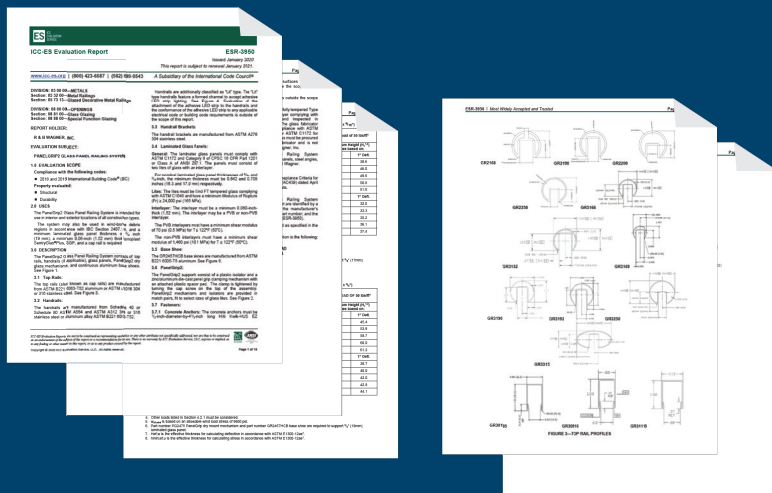

No special install tools or training required

Moulding can be painted to match existing application

Our patented PanelGrip® glass shoe railing system is a **high-performing, aesthetically pleasing** system that is faster to install and more cost-effective than other standard dry glaze glass railing options. When installed in accordance with ESR-3950, our PanelGrip® system is **ICC-ES compliant**. ICC-ES compliance means the system meets the latest building code requirements and can be easily approved by code officials as code standards have already been taken into consideration.

## ICC-ES Compliant

Our PanelGrip® system underwent rigorous independent testing against industry standards, product test data, and specifications to receive ESR-3950. This report gives contractors, architects, engineers, and building officials peace of mind that our products meet building codes, when the system is installed to the specifications outlined in the ICC-ES report.

The ICC-ES report should be used by the installer as an application guideline to ensure ICC-ES code compliance when installing the PanelGrip® system.
